1. The following is an examiner's statement of reasons for allowance: Applicants have submitted a Terminal Disclaimer to obviate the double patenting rejection over copending application 10/542,512. The closest prior art is Witten et al(Cancer 1962), which on pages 1044 and 1046 teach structurally similar compounds as claimed in herein. However, the reference compounds differ from the instant claimed compounds in that the reference compounds are not fatty compounds and does not have multiple carboxylic group. There is no motivation to arrive at the claimed compounds using the prior art, and thus instant claims are patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
